International Students' Union of Norway (ISU)

Re: Union Development Officer

Please accept this cover letter as an application for the above position, which I am particularly motivated for. I am especially interested in working for International Students' Union of Norway because of the unique opportunity to apply my all-round working experience from different fields of student politics. I believe ISU will benefit by applying my experience working in a local board, national and international level, relevant background and problem-solving ability. As you will see from the attached resume, I've worn a lot of different hats. As a president of ISU- University of Bergen and being a member student parliament at University of Bergen I've worked with a range of relevant tasks including supporting the work of the current board in contact with the local student organizations and maintaining regular communication with the university board. Extensive support activity, being the link between the ISU UiB and university of Bergen assertiveness, for handling challenging situations- I've done it. I'm extremely motivated, self-driven and aimed towards internationalization, possess a genuine interest in helping student and knowledge for monitoring and suggesting the possible enlargement of the organization. I have experienced extreme work pressure, heavy workload and deadlines – and so far, always had a positive feedback.

Studying Masters degree in the field of System Dynamics at University of Bergen provided me with strong competencies in the leading the work of the local chapters as a part of ISU system and in their development. I have enjoyed working in ISU for 1 year and with my work experience believe I possess a good combination of professional skills, qualifications, motivation and positive attitude which would benefit International Students' Union of Norway.

While as Electrical Engineer and with knowledge of System Dynamics is my core field I have a great interest and passion in the international relations and leadership development. I can contribute with my great creativity, ability to collaborate in a team and experience with arrangement student activities. My ability to work independent, structured and professional qualifications has grown since I had worked in Bangladesh and India. Also my part of my political life in biggest student party in Bangladesh. I believe my willingness to learn and strong communication skills both in English and three other languages will enable me to contribute effectively to International Students' Union of Norway. It would be a great pleasure for me to use my cross-cultural experience to perform the best of myself to benefit the goals of the Union.

Hopefully, you find my qualifications to be a good match for the position. Thank you for your consideration.

Sincerely,

Md Shifat Ullah

Md. Shifat Ullah.
