

Motivational note

I am self-motivated young African lady who has been representing students and fighting for academic freedoms and implementation on gender polices in Zimbabwe for the past four years. Against such a background it is my understanding that the International Students Union needs input form my perspective in order to continue to ensure the academic, social and economic rights of international students studying in Norway. I am therefore vying for the deputy chair position in the national board so as to make a fruitful contribution to the realization of our vision as international students in Norway.

Diversity is not about how we differ but rather the ability to embrace each other`s uniqueness, I believe that as part of the national board I will be able to actively contribute to building the bridge which covers the void between international and Norwegian students and make sure that each student knows their rights and responsibilities. There is also a need to establish the language buddy program in all local branches so as to help international students to make friends and look for part-time jobs.

Since we are living in a technologically advancing global village it is our personal mandate to make sure that diversity is embraced and uplifted for the betterment of the world at large. Narrowing down to Norway I believe that my experience with the UN students association, SAIH, Red cross, ZINASU , BOOST ENACTUS and the Female Students Network will be a fundamental aspect in upholding internationalization for tertiary education students. I am a good team player and I believe a person`s ability to lead is shown in how they serve, my leadership positions in my former university and clubs proves my commitment and working capabilities and it is my desire to share my skills with you and learn more in the process. Culture and education have no bounds or limits thus everyone should be able to blend in wherever they go.

We all have the desire to be heard but not everyone has the confidence and ability to stand up and speak out. From a tender age it has been my passion to be a voice for the voiceless and I make sure I help people wherever I go, Norway is no exception. There is nothing that can be done for the students without the students.
